

# Solutions from Intellisync

## Enterprise

The award-winning Intellisync Wireless Email is the only wireless email solution you need to deliver wireless messaging to all levels of employees. Intellisync's unparalleled support for devices and email sources lets you choose devices with features and costs tailored to the needs of different corporate roles, from executives to sales to field service engineers. Supported devices include Palm® OS, Pocket PC, Windows Mobile® Smartphone, Symbian® OS, SyncML clients, IMAP clients, BREW, and laptop/tablet PCs.

## Benefits for the Entire Enterprise

Managing mobile devices is not a problem just for the IT department. Effective management determines the success of your entire mobile enterprise and is necessary to realise the benefits of your mobile investments. Mobile Systems Management enables:

- Adoption and utilisation by end-users that is critical for a successful roll-out.
- A low total cost of ownership
- Comprehensive end-to-end security, including theft/loss protection, and push-based policy enforcement

## Business Needs

Intellisync's broad range of offerings allows you to fully mobilise your workforce in a secure, reliable manner. Encompassing all aspects of mobility, Intellisync provides the critical technology solutions needed to realise the full potential of smart devices and advanced wireless networks. Mobility offerings include:

- **Wireless Email:** Email/PIM sync solutions connect mobile devices to corporate email servers like Microsoft® Exchange and Lotus® Domino, simplifying the process for business professionals to access their email, calendar, contacts, and tasks.
- **Mobile Systems Management:** Systems management offers a powerful mechanism for remotely maintaining and securing mobile devices.
- **PIM synchronisation:** Desktop-PDA synchronisation offerings include Intellisync Handheld Edition for Enterprise and Intellisync Handheld Edition, supporting the synchronisation needs of a mobile workforce. For ISVs and ISPs we offer the PIM Platform, the leading OEM platform for PIM synchronisation.
- **File Distribution:** File synchronisation capabilities automate the process of distributing information throughout an organisation.
- **Device Management:** Device management provides a robust platform for mobile carriers to configure, update, and provision leading mobile devices for their customers.
- **Application Mobilisation:** Intellisync allows organisations to mobilise a wide range of enterprise applications and data to a wide variety of devices and platforms.

## Wireless Email

Intellisync provides wireless email products that span the needs of every market.

## Making it a solution with Phonesavers

Phonesavers can create a bespoke email solution integrated with Intellisync middleware on all supported devices connected to a choice of networks and also integrate it if required into your customers existing mobile contract.
